

Ishita Rajput

Product Designer (UI/UX)

ishitarajput321@gmail.com — (+91) 9837827132 — ishitarajput.vercel.app — linkedin.com/in/ishitarajput

Final-year B.Tech in Computer Science (Data Science) designing product interfaces since 2024. Two UI/UX internships, three live shipped sites, and a hospital management system covering twelve modules. I read the data model an interface sits on, which is why I take on the dense ones. Open to design internships and full-time roles now.

Education

ABES Engineering College, Ghaziabad

Expected Graduation: 2027

B.Tech in Computer Science Engineering (Specialization: Data Science)—**CGPA: 8.5 / 10**

Academic Achievements: 3rd Academic Topper - Data Science Branch—Class XII: 90%—Class X: 94%

Technical Skills

- **Design:** User research, Information Architecture, Interaction Design, Design Systems, Component Libraries, Wireframing, Prototyping, Usability Testing, Accessibility (WCAG 2.1 AA), Responsive and Dashboard Design
- **Design Tools:** Figma (components, variants, auto-layout, prototyping), FigJam, Tokens Studio, Maze, Miro, Adobe Illustrator, Adobe Photoshop, Canva
- **Technical:** HTML, CSS, Python, SQL, C++

Work Experience

Design Contractor - TechFrien Healthcare Solutions

Apr 2026 - Jun 2026

- Designed the marketing site for Medara HMIS - twelve-module architecture, a thirteen-token warm-paper colour system deliberately containing no blue, and an FAQ written as procurement objections rather than marketing prompts.
- Designed the product interface: twelve modules on one longitudinal patient record, organised around the sequence of a hospital shift rather than the database schema.
- Documented nine UI decision records with the trade-off accepted for each.

UI/UX Design Intern - Olinp Technologies

Feb 2026 - Apr 2026

- Designed and refined the Cognitome Program website, building responsive layouts, visual hierarchy, and a consistent component-based UI system across key pages in Figma.
- Analyzed user goals, information architecture, and navigation flows to simplify access to programs, services, assessments, and consultations.
- Translated user and business requirements into intuitive user flows, wireframes, and interface designs, improving content organization and overall usability.

UI/UX Design Intern - Vinkura

Oct 2025 - Feb 2026

- Designed and refined responsive web interfaces in Figma, applying visual hierarchy, interaction patterns, and component-based design to improve interface clarity and usability.
- Built reusable UI components and design patterns using Figma auto-layout to maintain consistency and scalability across the website.
- Created wireframes and interactive prototypes, translating user flow and navigation analysis into polished, user-centered interfaces.

Graphic Designer - Zeepty

May 2025 - Aug 2025

- Designed engaging social media creatives and promotional graphics for Zeepty, maintaining visual consistency with brand guidelines and communication goals.
- Created visually appealing layouts using typography, color, imagery, and composition to improve content presentation and audience engagement across digital platforms.

Projects

Credence - Transaction App

Figma, Wireframing, Prototyping, Design Systems

- Designed a transaction management app that simplifies money monitoring through week-wise, month-wise, and category-wise spending insights.
- Created user flows, wireframes, and high-fidelity interactive prototypes in Figma, focusing on intuitive navigation and clear financial information hierarchy.
- Developed reusable UI components and design patterns for transaction history, spending summaries, account balance, and financial activity to maintain consistency across the interface.

- Art-directed hero and banner graphics for a hand-rolled incense brand, building the visual language on process photography — hands, raw resin, unfinished cones — because provenance is the only credible substitute for a smell.
- Designed web page layouts and supporting visual assets, translating the brand identity into a distinctive digital aesthetic with consistent storytelling across the interface.

Certifications

- Microsoft Certified - UI/UX Design Professional

Leaderships and Achievements

- Vice-President, The Literary Society - Minerva, ABES Engineering College
- Runner-Up, Creative Writing Competition - LitFest-Joust, Jaypee Institute of Information Technology
- Participant, BrandSkulpt Design Hackathon - IIT Delhi
